COMP2081 – Advanced Web Design

PRESENTATION 1
Bootstrap Components

DESCRIPTION

Investigate *on your own*, an interesting HTML/CSS/JS component from the Bootstrap framework that we have *not covered in class*. Produce a short **instructional video screencast** or article detailing *how* it might be used and how to *implement and customize* it.

INSTRUCTIONS

1. Describe the component, and what it might be used for in a web application.
2. Walk your audience through the code (HTML, CSS, and JavaScript).
3. Show the audience how to implement the component and get it working effectively.
4. Demonstrate how to customize the component and how it might be improved upon.
5. Upload a link to the screencast video or short article to Blackboard – try to keep the entire screencast under 10 minutes.

EVALUATION

Please refer to the chart (assessment rubric) below. You will be graded on *how well* you followed the *above instructions*. This presentation is weighted **according to your course syllabus**.

Criteria	Mark
Component is effectively described, including possible uses/applications	/5
The code (HTML, CSS, and JavaScript) is described and or explained effectively	/5
The screencast video or article effectively demonstrates how to get the component working properly	/5
Ways to customize and/or improve upon the component are demonstrated	/5
The screencast video or article is lively, energetic, entertaining and interesting.	/5
TOTAL	**/25**
